

BLUE MED SERVICES

Thank you for choosing Blue Med Consultants to get your COVID-19 tests. We offer PCR, Rapid Antigen and Antibody tests with no out-of-pocket costs to insured patients. The turnaround time for the PCR tests are 24-48 hours upon delivery to the lab, and the Rapid Antigen and Antibody tests have a turnaround time of 15 minutes for written results. We email all results of PCRs, and we can email Rapid Antigen results if requested. Holidays or weekends may change PCR turnaround times, so for faster results we encourage the Rapid Antigen test.

HRSA FUNDING FOR UNINSURED PATIENTS UPDATE

Due to the lack of Federal appropriations for COVID-19 services, the Health Resources and Services Administration (HRSA) will no longer accept claims for COVID-19 testing of uninsured patients. Due to the lack of HRSA funding, Blue Med Consultants will no longer be able to conduct no cost out-of-pocket COVID-19 testing on uninsured patients effective Friday, 3/18/2022.

For patients getting a COVID-19 test with Blue Med, proof of insurance is required along with the patient's ID for COVID-19 testing. The test will continue to have no out-of-pocket cost to patients with insurance. For uninsured patients we offer the COVID-19 testing out-of-pocket.

We apologize for the inconvenience that the lack of HRSA funding will cause patients, and Blue Med is hopeful that HRSA can renew or reinstate the funding for COVID-19 testing for uninsured patients. Blue Med strives to make COVID-19 testing available for everyone in the community with no out-of-pocket costs and due to circumstances out of our control, HRSA funding limits who we can serve. Should HRSA be renewed or reinstated, we will promptly resume no cost testing for uninsured patients. We apologize again for this inconvenience.
